PuppyDex (PUPDEX) White Paper

Version 1.0 |

🔷 Abstract

PuppyDex (PUPDEX) is a community-driven, meme-powered digital currency built on the Binance Smart Chain (BSC), created with the guidance of AI (ChatGPT) and supported by transparent, fair, and renounced smart contract practices. PUPDEX aims to combine the playful charm of meme culture with real-world utility, long-term community engagement, and secure decentralized blockchain infrastructure.

With a fixed total supply of **100 billion tokens**, PUPDEX is designed to foster viral growth while maintaining trustless tokenomics—no transaction fees, no hidden taxes, no developer wallet. Ownership is **renounced**, and **only the deployer (founder)** has the ability to burn tokens voluntarily.

🔷 Vision & Mission

Vision

To become a **top 100 global meme token** by market cap and holder base—uniting communities with fun, transparency, and long-term value.

Mission

- To deliver a fair, community-first meme token experience.

- To use meme culture and grassroots support to scale awareness.

- To empower holders through full transparency, decentralized governance (eventually), and open-source infrastructure.

- To reach listings on major CEXs and CoinMarketCap/CoinGecko.

🔷 Key Features

Feature	Details
🔥 Total Supply	100,000,000,000 (100 Billion) Tokens

Feature	Details
🛑 **Ownership**	Renounced (verified on BscScan)
📜 **Fees/Tax**	Zero buy, sell, or transfer tax
🔒 **Liquidity**	LP locked or burned (community to verify)
🐾 **Founder Share**	15% of total supply held transparently by deployer wallet
🔥 **Burn Function**	Only the deployer (owner) can burn tokens to reduce supply
⚙️ **Utility**	Meme culture + roadmap features (NFTs, staking, future mini-dApps)

🔷 **Tokenomics**

Allocation	Percentage	Amount	Notes
Founder Reserve	15%	15,000,000,000	Held by deployer wallet
Public Launch	85%	85,000,000,000	Provided as liquidity, airdrops, etc.
Transaction Fee	0%	0	No tax or fees on transfers

✔️ *Contract ownership renounced.*
✔️ *No mint function exists.*
✔️ *No blacklist or pause function.*
✔️ *Verified source code on BscScan.*

🔷 **Smart Contract Information**

- **Contract Address**: 0xad7b1c60bB48B657A244FfE8A6971EeAce4Baf36

- **Blockchain**: Binance Smart Chain (BEP-20)

- **Verified**: ✅ BscScan Link

- **Source Code**: Verified and Open Source

- **License**: MIT

🔷 Roadmap

Phase   **Milestone**

✅ Phase 1 Token Launch, Ownership Renounced, BscScan Verification

✅ Phase 2 Community Formation, Social Channels Opened (Telegram, Twitter)

🚀 Phase 3 PancakeSwap Listing, First 1,000 Holders

🔜 Phase 4 CoinGecko + CoinMarketCap Listing Applications

🔜 Phase 5 NFT Mascot Collection – PuppyDEX Dogs

🔜 Phase 6 Gamification & Staking Features

🔜 Phase 7 CEX Listings and Viral Marketing Campaigns

🔷 Token Use Cases

1. **Community Rewards**: Airdrops, giveaways, contests.

2. **NFT Integration**: Collectible Puppy-themed NFTs.

3. **Gamified Features**: Meme battle mini-games (Phase 6).

4. **Charity**: Donations to real-world animal shelters (optional voting by holders).

5. **Staking**: Passive rewards in future dApp integrations.

🔷 Community & Governance

PUPDEX is **community-led**. Although the initial token structure and smart contract were created and deployed by the founder, the project has no centralized control or taxation mechanism. Governance in future versions may include:

- Voting via snapshots

- DAO-style treasury allocations

- NFT-based utility access

🔷 **Security & Transparency**

- 🔐 **Audit & Review**: Community audit pending

- 📃 **Code Verified**: Public and open on BscScan

- 🛑 **No Owner Control**: Ownership renounced

- 🔥 **Only Burn Rights**: Owner can only reduce supply (burn)

🔷 **Disclaimers**

This project is **not an investment**, and PUPDEX has **no guaranteed value**. It is created for fun, memes, and viral community growth. Always DYOR (Do Your Own Research). The founder and community are not liable for financial decisions made by others.
